👤 PROFILE

Experienced Front-End Developer with 4+ years of hands-on expertise in JavaScript, React.js, and TypeScript. Specializing in crafting and optimizing user interfaces for seamless experiences. Proficient in modifying and enhancing existing software. Strong team player with a collaborative approach, complemented by a proven track record as a self-driven solo contributor. Well-versed in cutting-edge development tools and procedures, adept at analyzing user needs and software requirements. Eager to contribute technical skills, creativity, and a strong work ethic to innovative projects and ready for new challenges.

📁 PROFESSIONAL EXPERIENCE

TopTeam Technologies Limited, Front-end Developer 🔗

December 2024 – present | United Kingdom

At TopTeam Technology, I lead the front-end development team, transforming design mockups into functional websites and addressing business needs through innovative technology solutions. Recently, I played a key role in the successful launch of the FBA Foundation (Fatima Abioye Foundation). My responsibilities included designing and developing an engaging website interface to publicize the foundation's agenda in partnership with TopTeam Technologies Limited.

In addition, I continuously support the business unit by providing essential features that enhance operational efficiency. This enables the team to focus on strategic goals rather than spending excessive time on repetitive, manual tasks, ultimately driving productivity and business success.

🧠 SKILLS

HTML5, CSS3, JavaScript, ReactJs, NextJs, Vue3, Bootstrap, TypeScript, Git and GitHub, Microsoft office packages, Tailwind css, React Query, Redux Toolkit, React Native, Material UI and Radix UI — communication skills, analytical skills, attention to detail, team player, and leadership skills.

📁 PROJECTS

Hamstrong Realty Limited 🔗

Hamstrong Realty Limited is a real estate platform designed to enhance the efficiency of house hunting and property purchasing. It also enables seamless sharing of properties across various social media platforms.

Along Project 🔗

This project is a collaborative effort with my friend, the project owner who brought the idea, and a couple of backend developers. I handled the entire front-end integration and mark-up. Although the project is not yet fully completed due to delays in some of the required APIs, the entire front-end UI has been finalized.

Management System Space, Details of the project cant be shared due to non disclosure. but involves the automation of numerous management system process. 🔗

Details of the project cannot be shared due to a company non-disclosure agreement. However, I am open to discussing the technical aspects of my contributions.

Accendis, Front-end Developer

September 2024 – January 2025 | Lagos, Nigeria

Worked alongside brilliant minds on *Accendis*, a Web3 social media platform that empowers digital creators by giving them control and rewarding their creativity. I contributed to and continue to play a role in the development of the platform's website.

Suburban Fiber Co, Compliance Officer

May 2024 – September 2024 | Abuja, Nigeria

I drove compliance through technology by enhancing various aspects of the company's in-app interface, including the messaging and notification systems, among others. Additionally, I contributed to automating the company's field reporting system in collaboration with the CEO and backend developers.

Most of my tasks involved leveraging existing backend APIs to retrieve data and presenting it on an insightful interface designed to support the company in making informed business decisions.

Management System Space, Front end Developer

January 2023 – May 2024 | Abuja, Nigeria

Collaborated closely with the team's lead developer to meticulously craft a pixel-perfect user interface that prioritized logical responses, ensuring a seamless user experience while adhering to excellent coding principles.

Specific roles and tasks encompassed:

- Developed and maintained the web application using React.js and Tailwind CSS for styling in the product's first version. Utilized React.js, Material-UI for the second version, and Next.js for the landing page.
- Designed a responsive user interface with cross-browser compatibility, ensuring optimal screen performance across various devices.
- Served as the front-end point of contact for addressing customer complaints and inquiries.
- Acted as a liaison between the business unit and the development unit.
- Worked with back-end engineers to create and consume Restful APIs while also testing them using Postman.
- Conducted debugging, code splitting, and performance optimization to deliver high-quality, bug-free software.
- Applied Agile methodologies to streamline development processes and improve project efficiency

Shortly, A straightforward website designed to assist users in shortening long URL links. This functionality proves particularly beneficial for individuals who frequently work with and manage links, such as teachers. 

December 2022 – December 2022

Project feature includes

- an input field for entering the URL to be shortened
- a simple user interface

Project dependency include

- integrating third party API for the URL submission and conversion.

Whistle-Blowing solution platform, The platform was created to address the challenges faced by whistleblowers, including but not limited to issues such as the disclosure of their identity, intimidation, stigmatization, assault, and discrimination in society that may occur when their identity is revealed as a result of whistleblowing. 

July 2022 – December 2022

Features of the platform include, but are not limited to:

- Real-time submission of reports by whistleblowers.
- Ability for whistleblowers to track the progress of their reports.
- Admin interface for monitoring and managing report submissions.
- Section to preview submitted reports and associated evidence in various formats.
- Option for whistleblowing without registering an alias on the platform.
- Capability to include evidence during whistleblowing, accommodating text, and file evidence in formats such as PDF, Excel, as well as PNG.

Weather Application, a simple weather application for checking real time weather report of cities around the globe 

May 2023 – May 2023

Project Features:

- Real-time display of weather information for 16 default cities.
- Search functionality to retrieve real-time weather for a specific city.
- Option to mark and remove cities as favorites.
- Note section to allow users to keep track of their notes.

Project Dependencies:

- Integration of a third-party API for fetching real-time weather information for the cities being looked up.

TiideLab, Internship

July 2022 – December 2022 | FCT, Nigeria

I served as an intern Front-End Developer, collaborating with a cross-functional team of 5. Together, we successfully developed a whistle-blowing solution platform using HTML, CSS, and JavaScript within the React framework.

My specific roles and tasks included:

- Designing and optimizing the landing page to ensure cross-browser compatibility and screen responsiveness.
- Designing and integrating the admin sections for efficient management of reports made by users.
- Designing and integrating the reporting interface for both anonymous and non-anonymous users.

AWARDS

Outstanding Team Members Honors Award (TIIDELab Fellowship Cohort 4 Fellowship Program (ITF-NEA TSDP, 2022)), TiideLab

17th December 2022

Volunteering Service Honors Award (TIIDELab Fellowship Cohort 4 Fellowship Program (ITF- NECA TSDP, 2022)), TiideLab

16th December 2022

CERTIFICATES

Certificate of proficiency as a Junior Frontend Developer (TIIDELab Fellowship Cohort 4 Fellowship Program (ITF-NECA TSDP, 2022))

LANGUAGES

Englis | Yoruba

EDUCATION

**Bsc Microbiology,
Usmanu Danfodiyo University Sokoto**

November 2014 – December 2018 | Sokoto, Nigeria
